

Really Cool + Keyboard

The Really Cool + is a waterproof and contaminant resistant keyboard with integrated two-button touchpad mouse. The two-button touchpad mouse is positioned below the space bar under the same silicon rubber housing. This full size keyboard with tactile feedback keys plus mouse saves valuable desk space. It uses only one USB cable for the keyboard and the integrated mouse. The sealed and rigid surface is ideal for industrial, marine, and medical use, as well as other applications where moisture, cleaning, and durability are a consideration. Because the Really Cool + is also quieter than "standard" keyboards and mice, they are great for applications where noise generated from "key-clicks" and mouse button clicks are a problem.
